

CONTEXT FOR THIS DOCUMENT

HopOn is a stable management app for professional equestrian facilities — trainers, barn owners, and their teams. This document is a recap of our first brand & universe session. It is shared as a **creative brief for logo exploration**. Nothing here is final; it is a directional foundation to work from.

① POSITIONING

What HopOn does, and for whom.

The app that simplifies your horse life · that turns your time into money.

Target: professional stables with trainers and boarders. Not recreational owners.

Not for: independents with no trainer or barn, or those keeping a horse at home for pleasure only.

Why open HopOn on a Tuesday at 7am: planning · financial dashboard · team view.

② BRAND PERSONALITY

The feeling HopOn should give — five reference apps chosen for a specific reason each.

Lululemon energy · intentional · positive · 30–40 y.o. · 80% serious / 20% friendly.

Strava — habit-building through network effect

MindBody — same vertical, same business model

Doctolib — trusted, clean, pro

Uber — just works

Airbnb — elegant for both sides of the transaction

③ FORBIDDEN CODES

④ EQUESTRIAN WORLD

Hard lines — not up for debate.

Not the Facebook of horses · no cluttered UI · not decorative like Hermès · not low cost · not slow · no added complexity.

WORDS THAT WOULD MAKE US CRINGE

UNRELIABLE GIMMICK

COMPLICATED BUGGY SLOW

The exact slice of the equestrian world HopOn lives in — not elite FEI, not backyard hobby.

A farm where there are lessons.

Visual codes that feel right: shades of green · wood · rectangle shapes (arena).

Color direction: **green** — eucalyptus family, not dark forest, not neon.

⑤ TARGET EMOTIONS

The emotional outcome, not just the functional one.

Satisfied · reassured · **motivated** — help pros improve their business, and for some, save it.

THREE WORD-OF-MOUTH PATHS, ALL ORGANIC

Pro → Pro · Amateur → Amateur · Amateur → Pro: "my old barn used HopOn."

⑥ VISUAL DIRECTION

First directional decisions — not final, to be validated.

Eucalyptus green — calm and professional. MindBody feel, not dark equestrian.

The anchor color is **#2A957F** (g500) — primary CTA and brand fill. Full ramp below.

Typeface direction: **Calibre** — to be confirmed.

Color Palette · Eucalyptus

TOKEN	HEX	USAGE
 g500	#ECFBF6	Very light background, tints
 g100	#D6EFE1	Brand tag background
 g200	#95CDBA	Light accents, avatars

☐ g300	#5CC0A4	Dots, mid accents
☐ g400	#36B399	—
☐ g500 ANCHOR	#2A957F	Primary CTA · brand fill
☐ g600	#207A66	Brand text, links
☐ g700	#18604F	Dark hero cards
☐ g800	#114836	Deep headers
☐ g900	#0B2F23	Welcome screen background · darkest shade

NEUTRAL

☐ BG · #F3F5F3 ☐ Surface · #FFFFFF

Logo · Brief for Exploration

WHAT WE KNOW

- We love the word **Hop** — it's energetic, short, equestrian without being literal.
- We love the letter **H** — strong, structured, works as a standalone mark.
- The brand name is **HopOn** — both the H and the second O are capitalized. This is a naming convention, not a visual instruction.
written
- Color direction: eucalyptus green family. Anchor: **#2A957F** .
- Feel: professional, calm, trusted — closer to Doctolib or MindBody than to a heritage equestrian brand.

NAME AS WRITTEN

HopOn

Capitalization is part of the brand identity. The visual treatment of H and O is open — that's the brief.
