

HopOn

Hi — Hippolyte here. First edition of the HopOn monthly update. Before the news, I wanted to introduce the people building this with me.

THE TEAM

Hippolyte Réchard

Founder & CEO

HOPON

Julien Revault d'Allonnes

CTO

HOPON

Brice Goguet

Co-founder & CEO

VOLTAIRE GROUP

Laurent Renard

Lead Developer

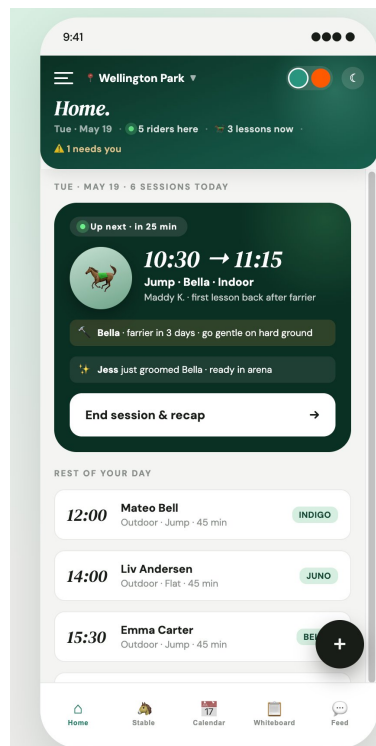

VOLTAIRE GROUP

1 — THE NEWS

We hired a builder.

Julien joined as CTO and immediately rebuilt the app on React Native — a proper foundation to ship to the App Store and scale cleanly.

We target Q4 2026 for App Store release, in time for the January 2027 winter circuit in Ocala and Wellington.

2 — WHERE WE STAND

Three things locked in.

CTO Onboarded ✓

App rebuild Underway ✓

App Store Q4 2026

3 — WHAT WE BUILT THIS MONTH

Sprint 1 — Product foundations.

We ran our first product sprint with the full team. Key outputs:

- **4 user personas validated** — Owner, Trainer/Rider, Groom, and Client. Four distinct roles, four distinct needs — the foundation for everything we design.
 - **3 core problems prioritized** — Booking friction, payment tracking, and barn management simplified.
 - **Architecture decided** — Supabase as backend, React Native for the app. Stack chosen for speed to market and long-term scalability.
 - **Operator home screen designed** — First screen of the app live in staging. Features available in V1: homepage overview, calendar with automatic payments, stable onboarding, virtual whiteboard, feed / post page, dashboard.
-

4 — WHAT I NEED

We're raising. Intros welcome.

If you know a barn owner, trainer, or equestrian investor who'd want to back the operating system for the equestrian world — I'd love an intro. Happy to share the deck and terms directly.
